

NORDCO EQUIPMENT SERVICES BULLETIN

A NEW NAME AND EXPANDED FOCUS

The familiar Aftermarket Parts Report has a new name, the Nordco Equipment Services Bulletin. This reflects our expanded coverage of Nordco's complete line of aftermarket products and services, including Machine Parts; Repair and Upgrade Kits, Rebuilt and Exchange Components and Rebuilt Machines. We will continue to provide useful information on our existing offerings, as well as inform you as new products and services are introduced.

Nordco Exchange and Rebuilt Component Program: How it works and what it does for you

Nordco's Exchange and Rebuilt Component Program is an efficient and cost-effective way for you to repair and maintain your MOW machinery. It's simple: You send your worn out unit to Nordco. Depending upon the component, we either rebuild your unit or send a completely refurbished replacement. Nordco offers a wide selection of Exchange and Rebuilt Components for most of our current and many older machines, including:

- **Workheads**
- **Axle Assemblies**
- **Carriages**
- **Spiker Guns**
- **Circuit Boards**
- **Clamp Arms**
- **Bulk bins**

Nordco Exchange and Rebuilt Components offer multiple benefits including:

- It's an economical alternative to replacing a major machine component with a new unit or repairing it yourself.
- It makes it easy to plan and manage machine maintenance. Simply rotate worn units out on a regular schedule.
- It reduces the need to store and dispose of worn out components.

Each month the **Equipment Services Bulletin** will feature one or more of the items highlighted above. In the meantime contact **Paula Ranchel** at **262-358-1352** or by email at **pranchel@nordco.com** for more information on our complete line of Exchange and Rebuilt Components.

Top: Rebuilt CX Hammer Bulk Bin. Right: TRIPP Gripper Exchange Assembly. Bottom: Exchange Axle Assemblies readied for shipment from Nordco.

NEW FROM NORDCO

**Featured Product:

For a complete list of machine kits, go to Maintenance-of-Way Parts at www.nordco.com and select [Search for Repair and Upgrade Kits](#)

Parts Notes...

NEW M2-14 KIT: Nordco has developed a new kit for the M2-14 Ballast Regulator & Snow Fighter. The **98800039 Valves Kit** includes upgraded main hydraulic valves for the M2-14 that offer improved performance, especially in extreme weather conditions. The kit includes four valves and all required harnesses and hardware. The kit also includes two electric control joysticks that eliminate the need for hydraulic hoses inside the cab. One kit per machine, shop installation required. Consult Nordco Parts to determine if the kit is suitable for your machine.

SPARE PARTS PACKAGES EXPANDED: Several Nordco **Spare Parts Packages** have been revised to include new components introduced in recent months. To date Nordco has developed more than 100 Spare Parts Packages for 17 different machine types. For a complete list of packages, searchable by machine type, go to Maintenance-of-Way Parts at www.nordco.com and select **Spare Parts Packages**.
